

hdpm update

Nathan Sparks

ASU

Offline Meeting

03/30/2016

hdpm roles

- Software/build configuration
- Fetching and building offline software
- Updating/rebuilding offline software
- Running offline software

Recent changes

1. Setup file can be sourced from any directory
2. Use hdpm commands from any directory
3. Option added for passing subdirectory of sim-recon to “build” command
4. Added “hdpm run” command

Example

- `cd work && source ../setup.csh`
- `hdpm build -c ../pkgs/sim-recon/src/plugins/
Analysis/TPOL_tree`
- `hdpm build ../pkgs/sim-recon/src/plugins/
Analysis/TPOL_tree`
- `hdpm run bash`

Documentation

- Check the prereq's, listed in the documentation
- Find documentation at <https://github.com/JeffersonLab/hdpm/wiki>
- `git clone https://github.com/JeffersonLab/hdpm`
- `cd hdpm && source setup.csh`
- `hdpm help`
