

Status of Online Monitoring Plugins

2014/10/07

Kei Moriya

Detector Systems (alphabetical)

Detector name	developed?	test with data?	notes
BCAL	YES	YES	Plugin is well-developed, tested
CDC	YES	YES	
FCAL	NO	YES	Matt developing
FDC	YES	YES	
PSC	NO	NO	still template/MEPHI?
PS	NO	NO	still template/MEPHI?
ST	NO	NO	checked with Eric last week
TAGH	YES	YES	Hits from DTAGHDigiHit, no DTAGHHit
TAGM	YES?	NO?	still template
TOF	YES	NO?	

Other Systems

Detector name	developed?	test with data?	notes
CODA	?	?	No histograms
DAQ	YES	?	
EVNT	YES	?	
L3	NO	NO	still template?
TRIG	NO	?	still template?

- Are these needed as part of online monitoring?

Looking Forward

- All necessary online plugins need to be developed soon
- Need to test, vet necessary plots
- Beamline is lagging
- Should we have common convention for channel #'s (centered at half-integer, start at 1, ...)?
- Should we track underflow/overflow? Useful for FCAL?
