

Pedestal level is averaged over the samples 1-15.

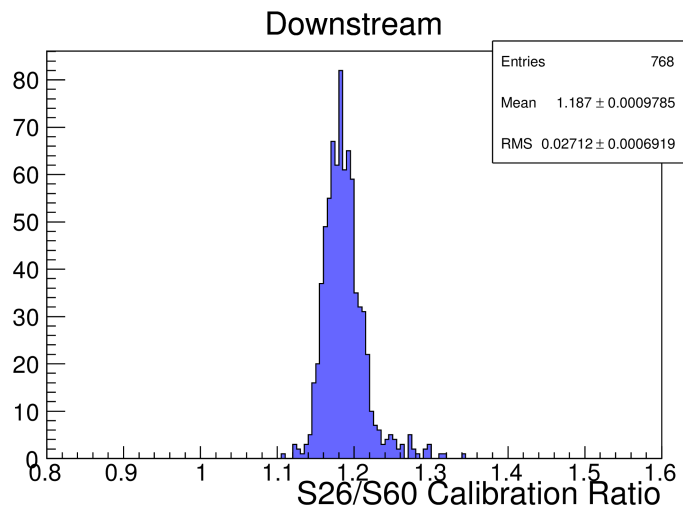

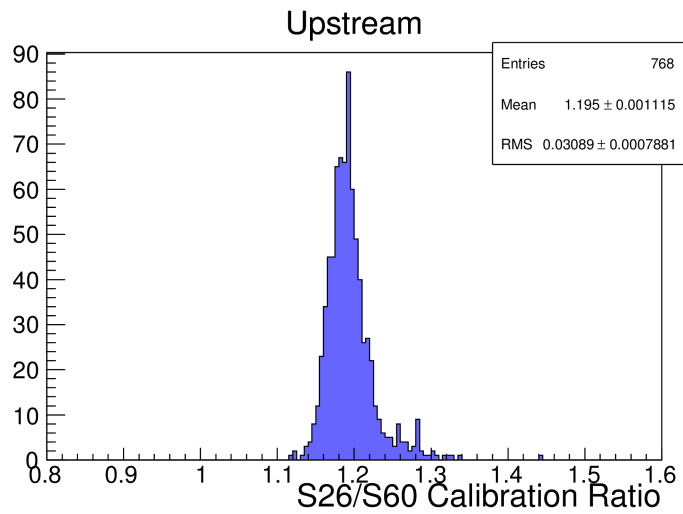

“Start of the Peak” is the first sample that exceeds the pedestal level by more than the threshold of 5 counts. (Also, I require that the next sample exceeds the “pedestal+threshold “ level too.)

π^0 -Reconstruction made by Will with our new calibration:
Fall 2015 runs 4323, 4399, 4400, 4401, 4404, 4405
(1.4-V Overbias, NSA=26, NSB=0)

Runs 4062 and 4101: 1.4-V Overbias

Ratio of calibration constants for
(NSA=26,NSB=0) and
(NSA=55,NSB=-5) integration
