

First Attempt at Simulations using Hybrid FCAL

↓
 $\gamma\gamma$

Thrown Events

Thrown momentum in GeV/c

Thrown theta in degrees

Thrown phi in radians

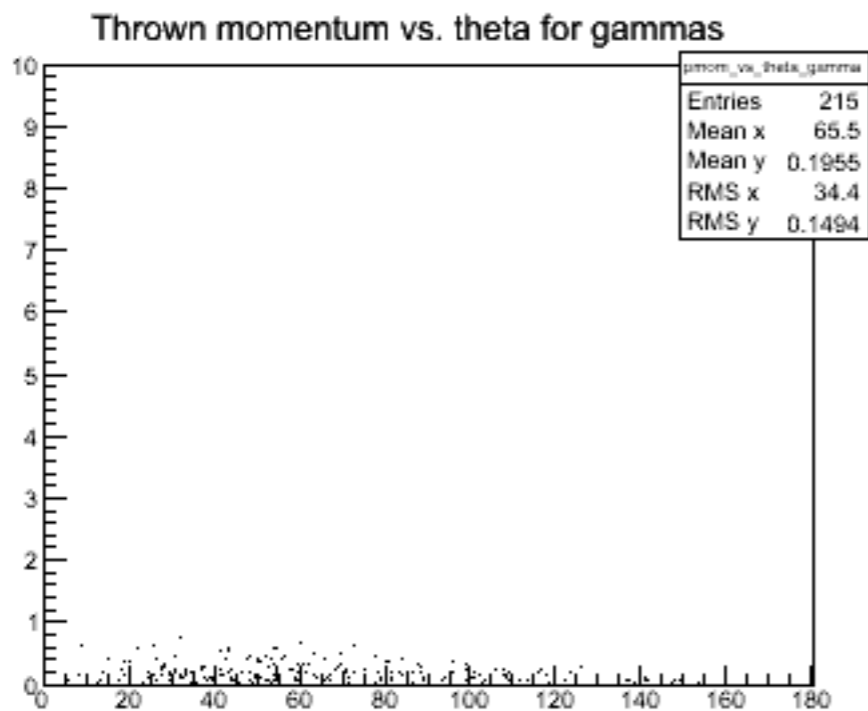

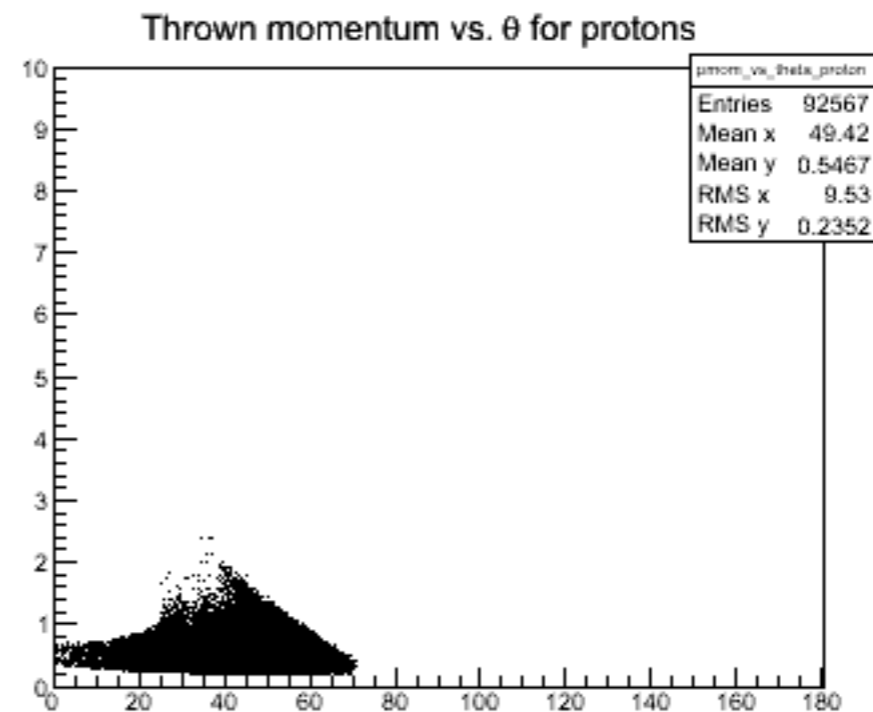

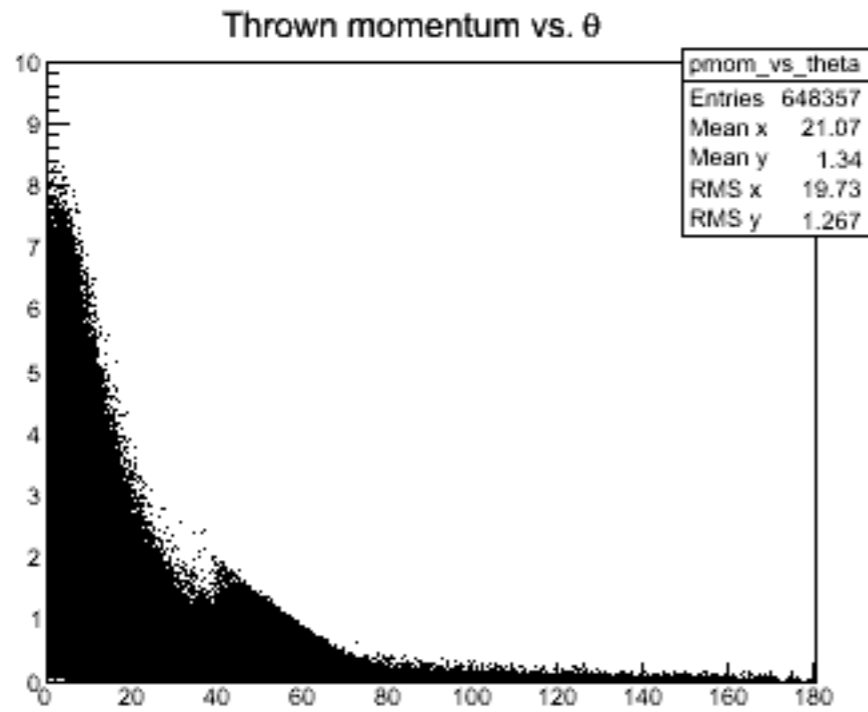

Number of thrown particles per event

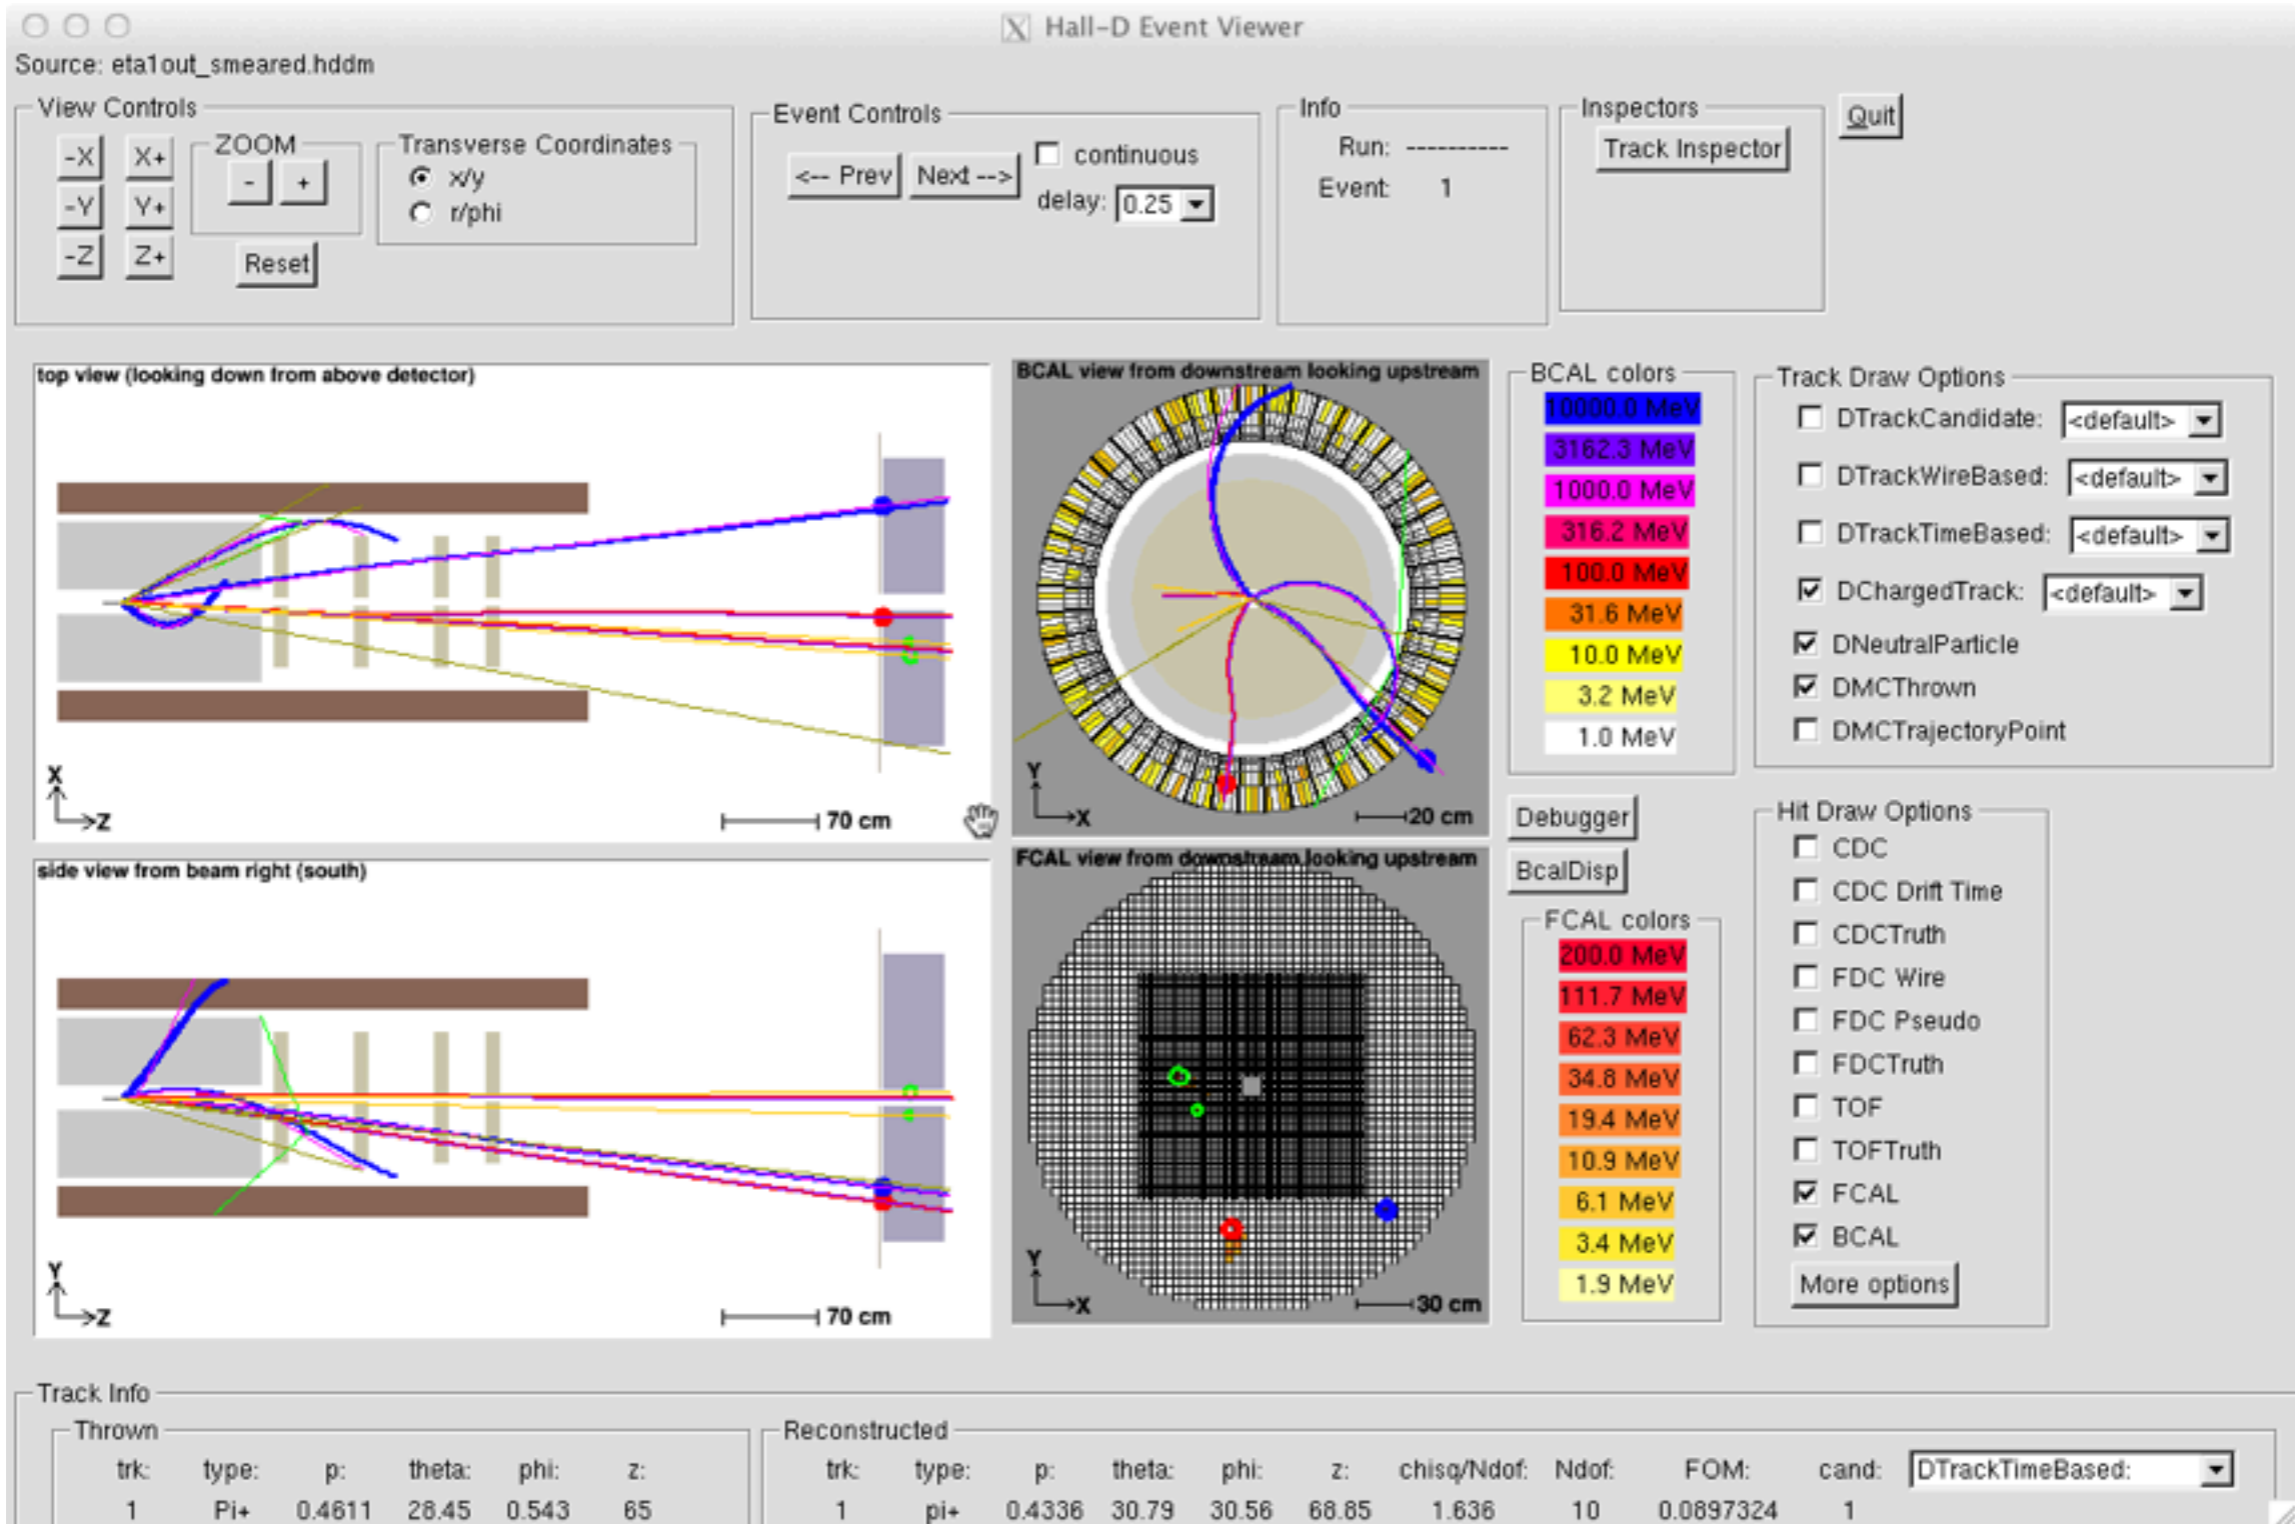

$\times 10^3$ GEANT3 particle type of thrown particles

Thrown Events

Thrown Events

Number of thrown particles per event

GEANT3 particle type of thrown particles

Thrown momentum vs. theta for gammas

Thrown momentum vs. θ for π^-

FCAL
