

Ethernet Control of W-IE-NE-R Power Supplies

TCP/IP over Ethernet

- Integration into existing 10M/100M LAN
- Standard Network Cables, RJ45-Connector
- Simple control with integrated WWW-server using any WEB-browser (MS Internet Explorer, Mozilla Firefox and Linux Konqueror are tested)
- Complete control with SNMP (Simple Network Management Protocol)
- Additional connection to the RS232-port of a VME CPU with TELNET protocol (used to monitor boot messages/BIOS access)

TCP/IP over Ethernet

SNMP

- SNMP is a well defined protocol, we use protocol version 2c (Access control with community names)
- Different access rights (read only, simple control, ...)
- Many utilities available (Windows/Unix),
 - Command Line (Batch files)
 - PERL
 - PHP (stand alone or in the APACHE WEB-server)

TCP/IP over Ethernet

SNMP Command Line Tools (www.net-snmp.org)

```
C:\>snmpget -v 2c -m +WIENER-CRATE-MIB -c public 192.168.91.80  
outputMeasurementSenseVoltage.U1
```

```
WIENER-CRATE-MIB::outputMeasurementSenseVoltage.U1 = Opaque:  
Float: 12.020000 V
```

```
C:\>snmpset -v 2c -m +WIENER-CRATE-MIB -c guru 192.168.91.80  
outputVoltage.U0 F 4.0
```

```
WIENER-CRATE-MIB::outputVoltage.U0 = Opaque: Float: 4.000000 V
```

Command & basic parameters

Crate IP address or DNS name

Date Type & Value

Community name

Item to get/set

Response (Answer of the crate)

TCP/IP over Ethernet

SNMP Access Control: Display of the Community Strings

```
C:\>snmptable -v 2c -m +WIENER-CRATE-MIB -Ci -c guru 192.168.91.80  
communityTable
```

```
SNMP table: WIENER-CRATE-MIB::snmp
```

```
index snmpCommunityEntry  
public      "public"  
private     "private"  
admin       "admin"  
guru        "guru"
```

Command & basic parameters

Crate IP address or DNS name

Date Type & Value

Community name

Item to get/set

Response (Answer of the crate)

TCP/IP over Ethernet

Change „private“ Password (WEB/SNMP)

```
C:\>snmpset -v 2c -m +WIENER-CRATE-MIB -c guru 192.168.91.80  
snmpCommunityName.private s seCrET
```

```
WIENER-CRATE-MIB::snmpCommunityName.private = STRING: "seCrET"
```

- Lost passwords: Restore of the default values with the (hardware) switches at the front pannel.

Command & basic parameters

Crate IP address or DNS name

Date Type & Value
