

# PAC Planning Discussion Preamble

- “Endorsement” = commitment of support from GlueX Collaboration
  - see linked slides from our bi-weekly meeting last week for more information
- Session 1
  - Neutral Pion Polarizability: seeking endorsement; review by Barry Ritchie and Joerg Reinhold in progress
  - Charged Pion Polarizability: endorsed; will go to PAC as part of the jeopardy process
  - Test of GDH Sum rule: seeking endorsement; reviewed by Garth Huber and Frank Nerling; CB recommends endorsement; moving to collaboration for review and vote
- Session 2: GlueX w/DIRC + JEF Jeopardy
  - JEF: endorsed; design for FCAL insert underway
  - “GlueX-II”: endorsed; DIRC installed and 40 days of data have been taken
- PAC deadlines: June 22 (written material); talks in August
- Emphasis for this morning session: engage collaboration in a discussion of the strategy for each proposal and plan going forward
- Not discussed this morning or subject to jeopardy, but important
  - planned short-range correlations run; this is tentatively scheduled for 2021 and seeking endorsement
  - PrimeEx-eta: endorsed and planned to run to completion in 2021
