

Cookies with silicone from a new bottle

Maria, Yunjie

We ran out of our silicone and got some from Or's group

new, 3 components

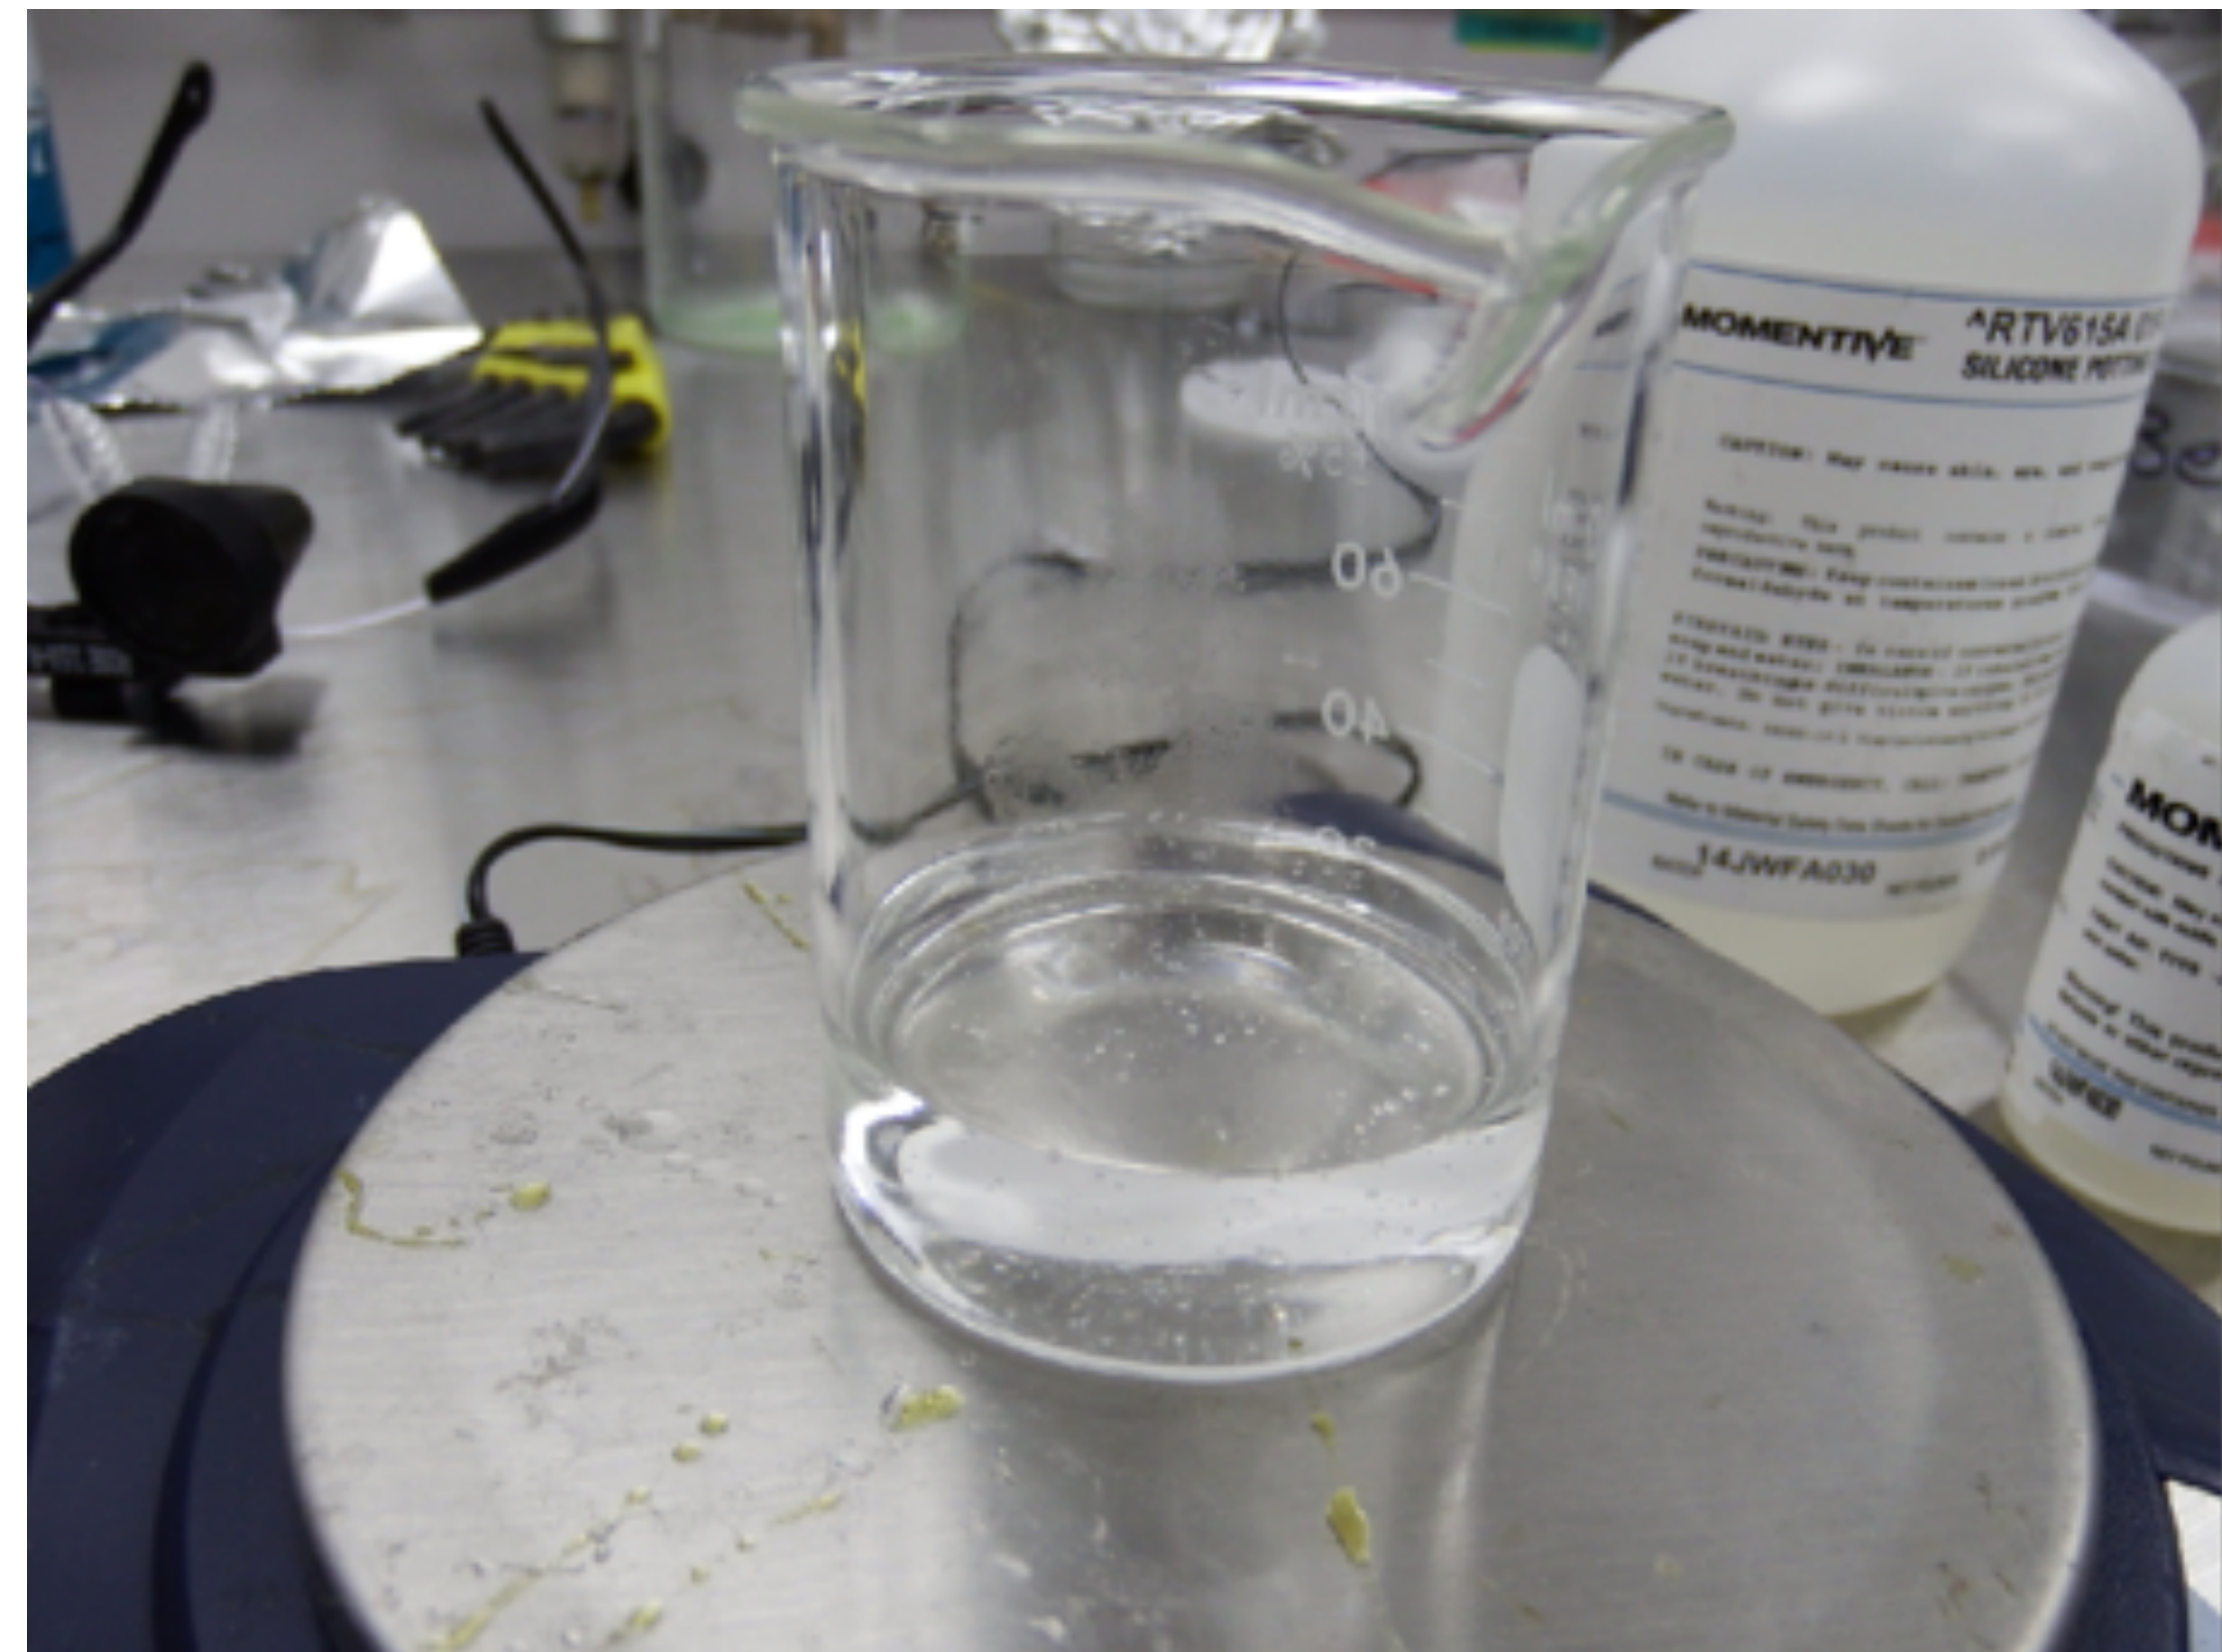

old, one component

Apparently it is not as transparent as the old one

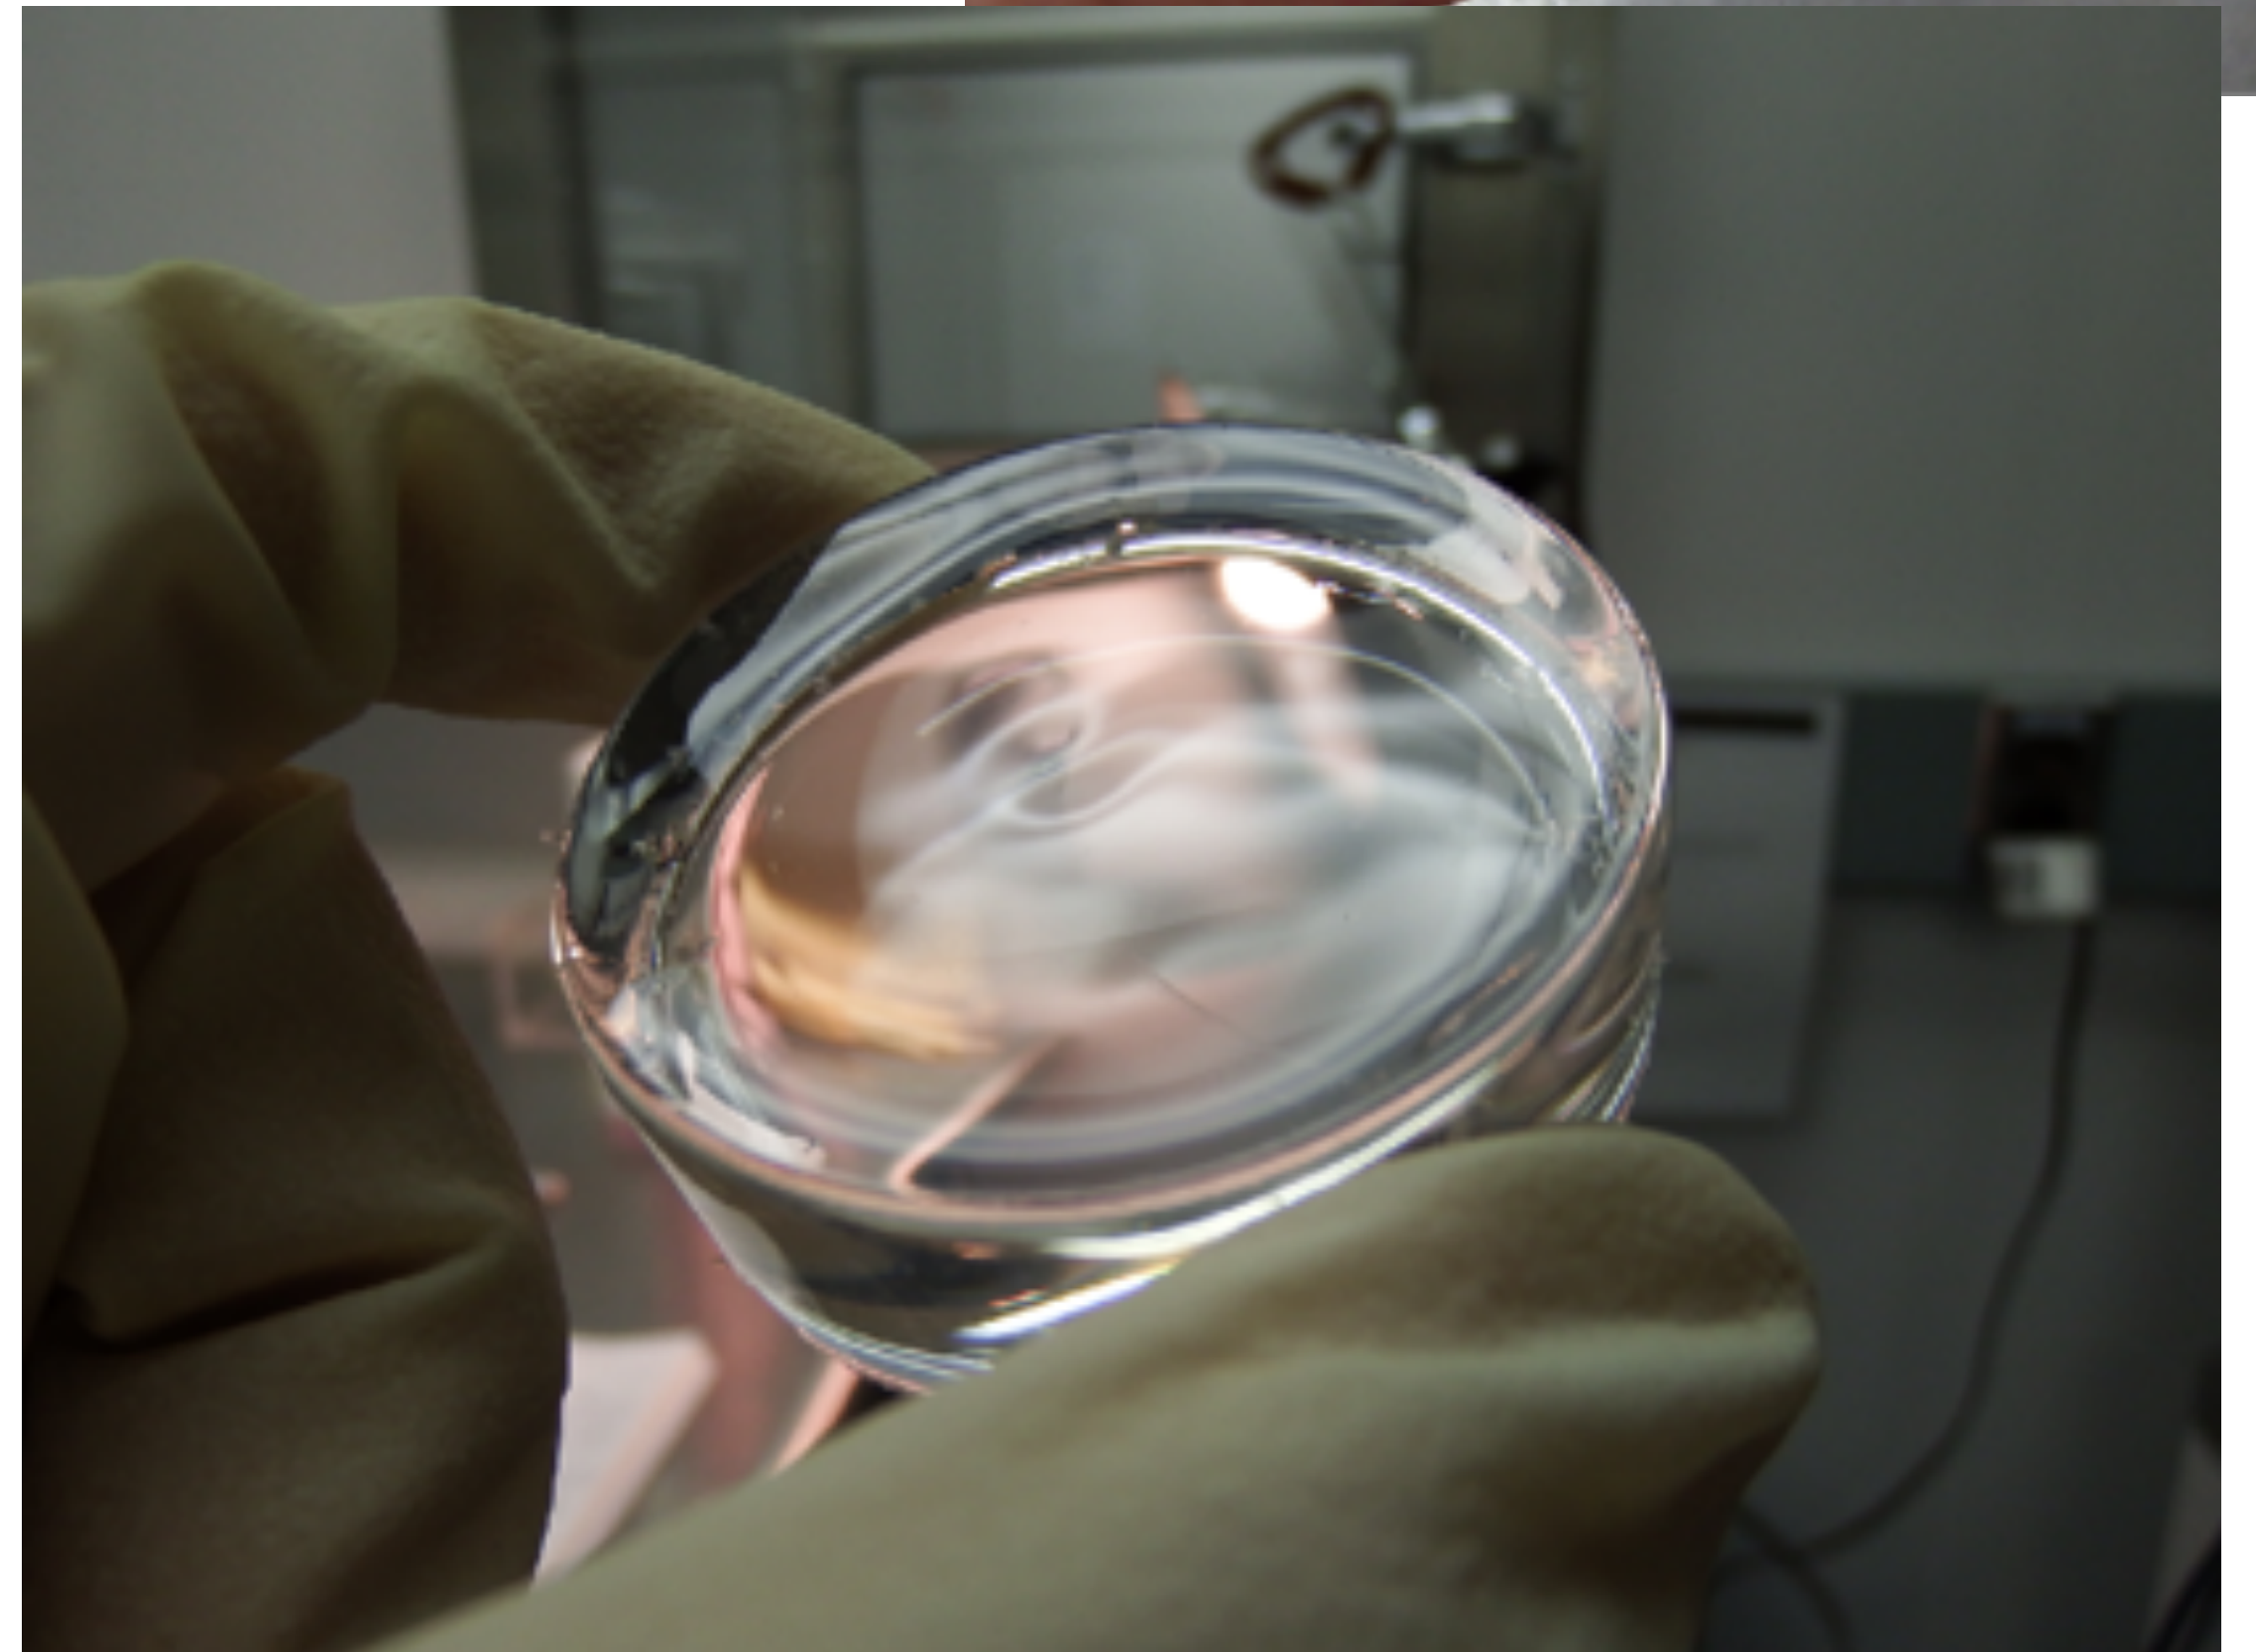

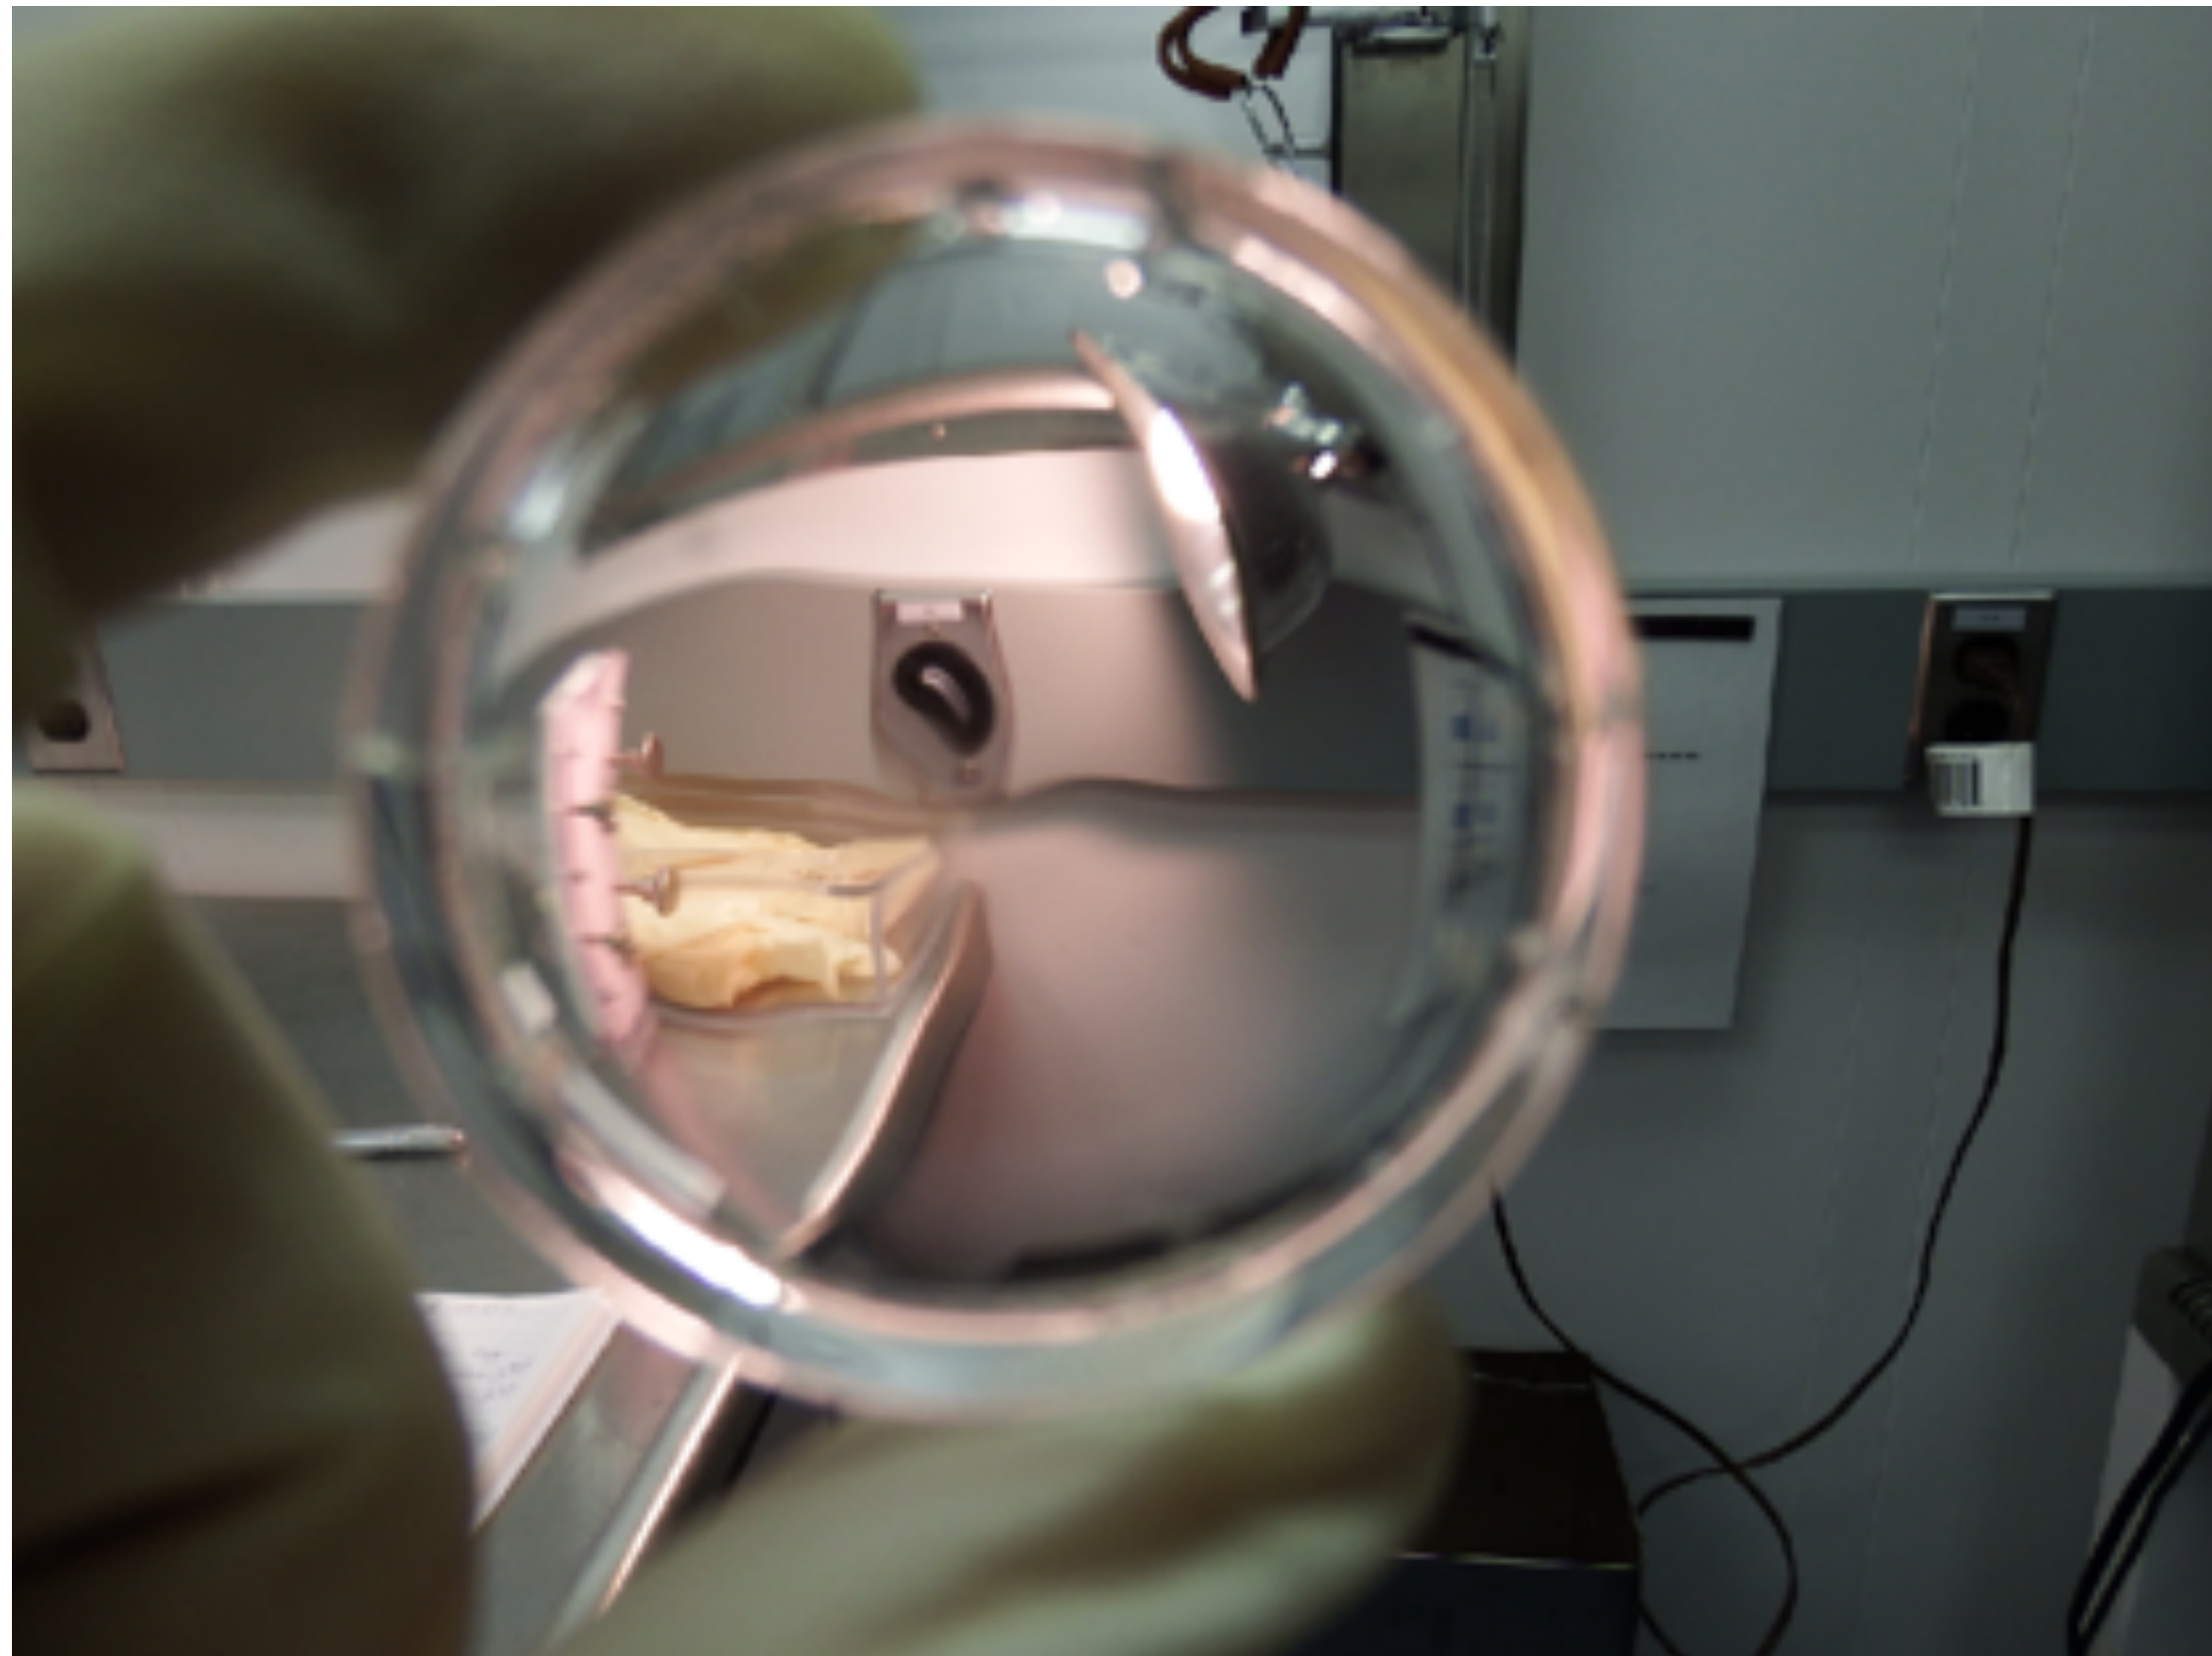

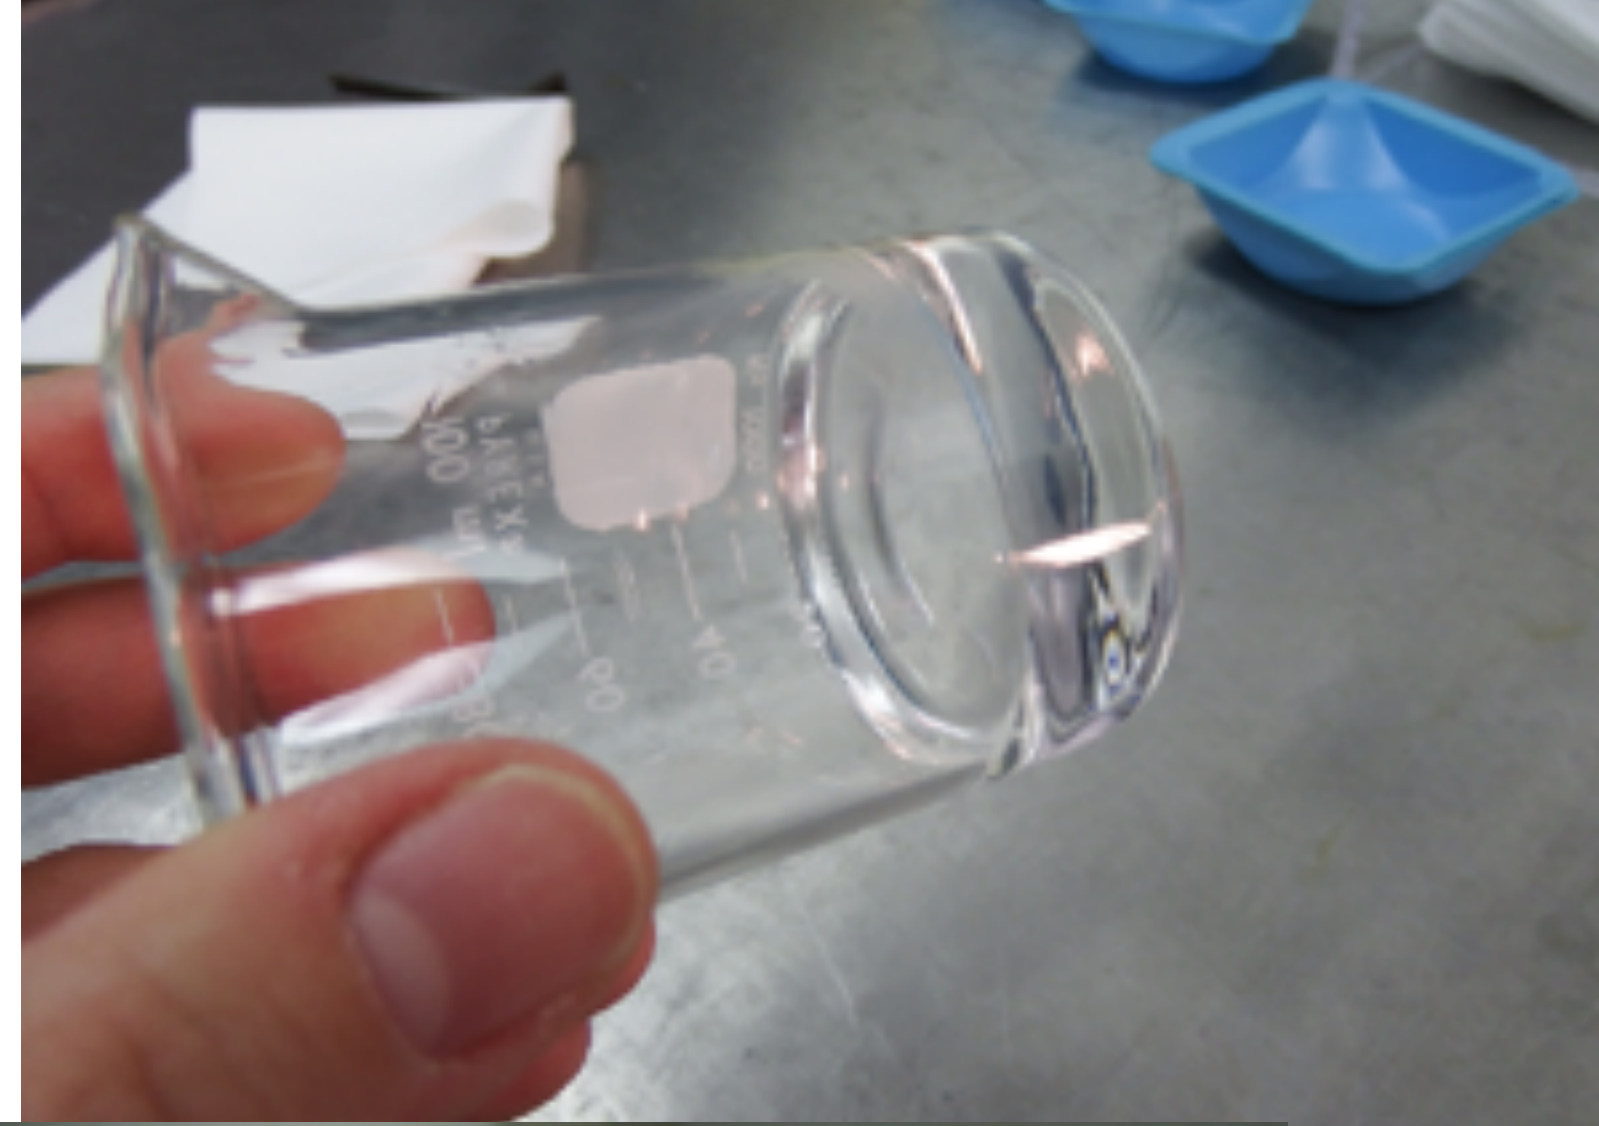

**new,
Efrain claims that this material used to be clear when they used it (about 1 month ago)**

old

**A thick piece of old silicone
looks like clear glass**

The change in

Conclusions

- We started a new bottle of silicone (which we never did before)
- The new silicone seems to be less transparent than the old one
- It is hard to say how less transparent an individual cookie made of the new silicone is
- New bottle of silicone is needed?
- Transmittance measurement required?
