

Offline Task Priorities

Simulation/Reconstruction

- 1 photon clusters
- 2 further tests of reconstruction code
- 3 event display
- 4 conversion to Geant4
- 5 event generator development
- 6 measurement error verification

Software/Data Management

- 1 plan next data challenge
- 2 data distribution
- 3 amplitude analysis code management
- 4 micro-DST format
- 5 profiling code
- 5 project management
- 6 MySQL replication
- 7 unit testing
- 8 conversion to git

Documentation

- 1 CCDB documentation
- 2 write the data challenge report
- 3 Doxygen configuration
