

For your information, please note that the chemical composition of 99.970% minimum purity lead under the BS EN 12659:1999 Standard is as follows:-

CHEMICAL COMPOSITION OF LEAD – MATERIAL NUMBER PB970R

Element	Composition, % (m/m)
Indicative lead content	99.970
Silver	0.0050
Arsenic	0.0010
Bismuth	0.030
Cadmium	0.0010
Copper	0.0030
Nickel	0.0010
Antimony	0.0010
Tin	0.0010
Zinc	0.0005
Total	0.030

NOTE 1 – Indicative lead content: 100 – (total impurities)
