

# ANALYSIS OF THE EMPTY CELL RUNS INCLUDING COMPARISON WITH SIMULATION

$$\gamma p \rightarrow \rho p \rightarrow \pi^+ \pi^- p$$

NATHALY SANTIESTEBAN  
APRIL 2021

# DATA SELECTION

Empty Cell Runs

030333 030334 030335 030336 030337

030728 030949 030564 041155 040903

041615 051556 041386 051011 051013 050766)

- $E_\gamma > 7 \text{ GeV}$
- 3 Charged Tracks (-,+,+) =  $(\pi^-, \pi^+, p)$  (Hypothesis)
  - Probability of being  $(\pi^-, \pi^+, p) > 1\text{E-}4$  based on the timing information.
  - Vertex fit (Coming from the same vertex)
  - $\text{CL} > 0.002$  (Confidence Level of the vertex fit)
- $79.8 \text{ cm} < Z_{\text{vertex}} < 85 \text{ cm}$ : Kapton and Al endcaps selection
- $|dE| < 1 \text{ GeV}$ , where  $dE = E_\gamma + m_p - E_p - E_{\pi^+} - E_{\pi^-}$
- In-time Photons  $\Delta t = t - \left( t_{RF} + \frac{Z_{\text{vtx}} - Z_{\text{Center}}}{29.9792458} \right) < 2 \text{ ns}$

$t$  : Time from the vertex fit

$t_{RF}$  : Time from the beam to the center of the target

$Z_{\text{vtx}}$  : Z position from the vertex fit

$Z_{\text{center}}$  : Z position from the center of the target (65 cm)

$$\gamma p \rightarrow \rho p \rightarrow \pi^+ \pi^- p$$

## CANDIDATES

- Mass of the reconstructed rho:  $0.6 < m_\rho < 1$ . [GeV]
- Coplanarity between  $\rho$  and p:  $150 < \Delta\phi(\rho - p) < 200$  deg
- The remaining improperly reconstructed  $\pi^+$  and p can be removed by using:  $m_{\pi^- p}^2 > 4 \text{ GeV}^2$  and keep most of the  $t > -1 \text{ GeV}^2 \text{ GeV}$ ,  $u > -2 \text{ GeV}^2 \text{ GeV}$

$$t = -(P_\gamma - P_\rho)^2 \quad \text{where } P_\rho = P_{\pi^+} + P_{\pi^-}$$

$$s = (P_\rho - P_p)^2$$

$$u = -(P_\gamma - P_p)^2$$

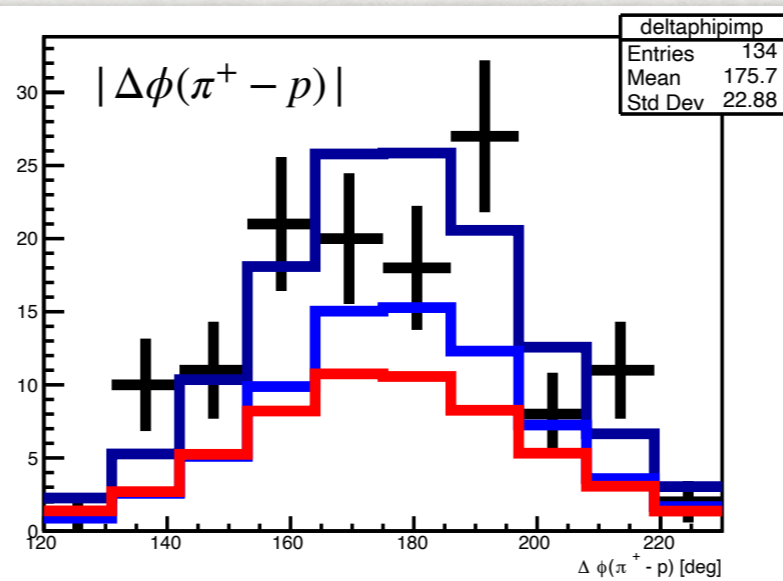

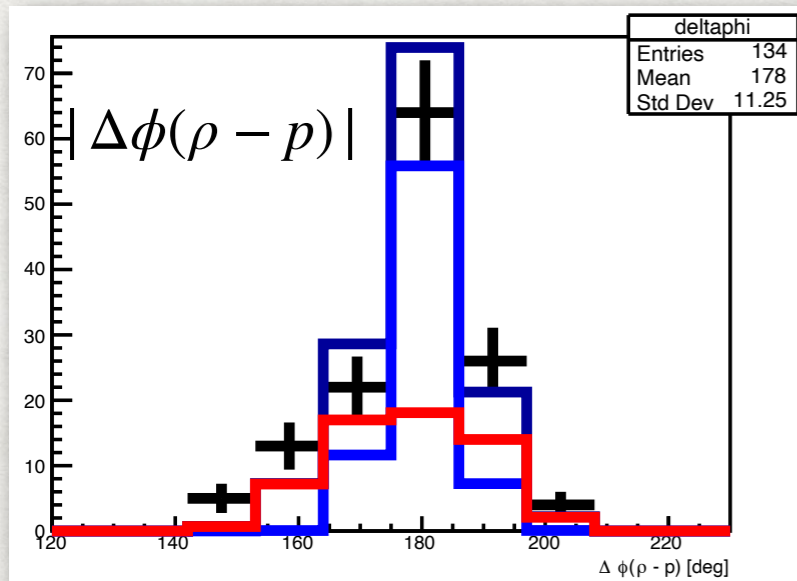

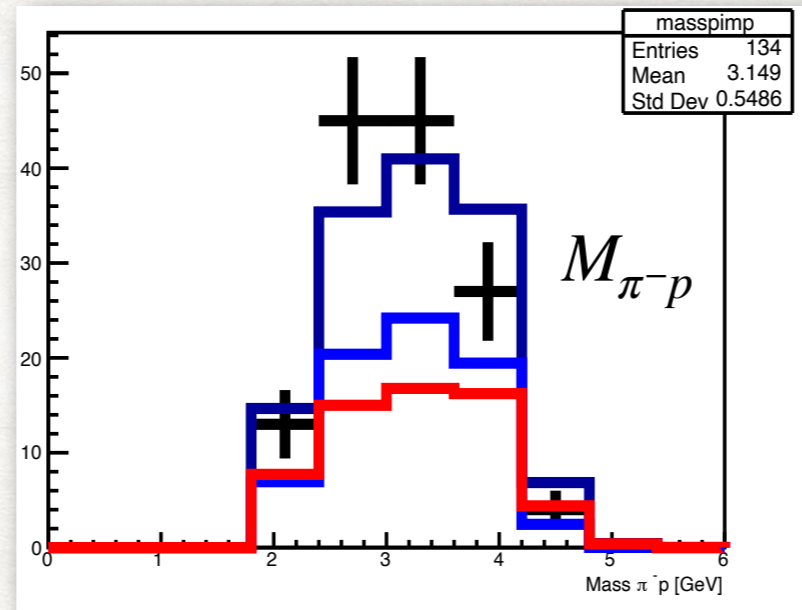

$$\gamma p \rightarrow \rho p \rightarrow \pi^+ \pi^- p$$

## SIMULATION

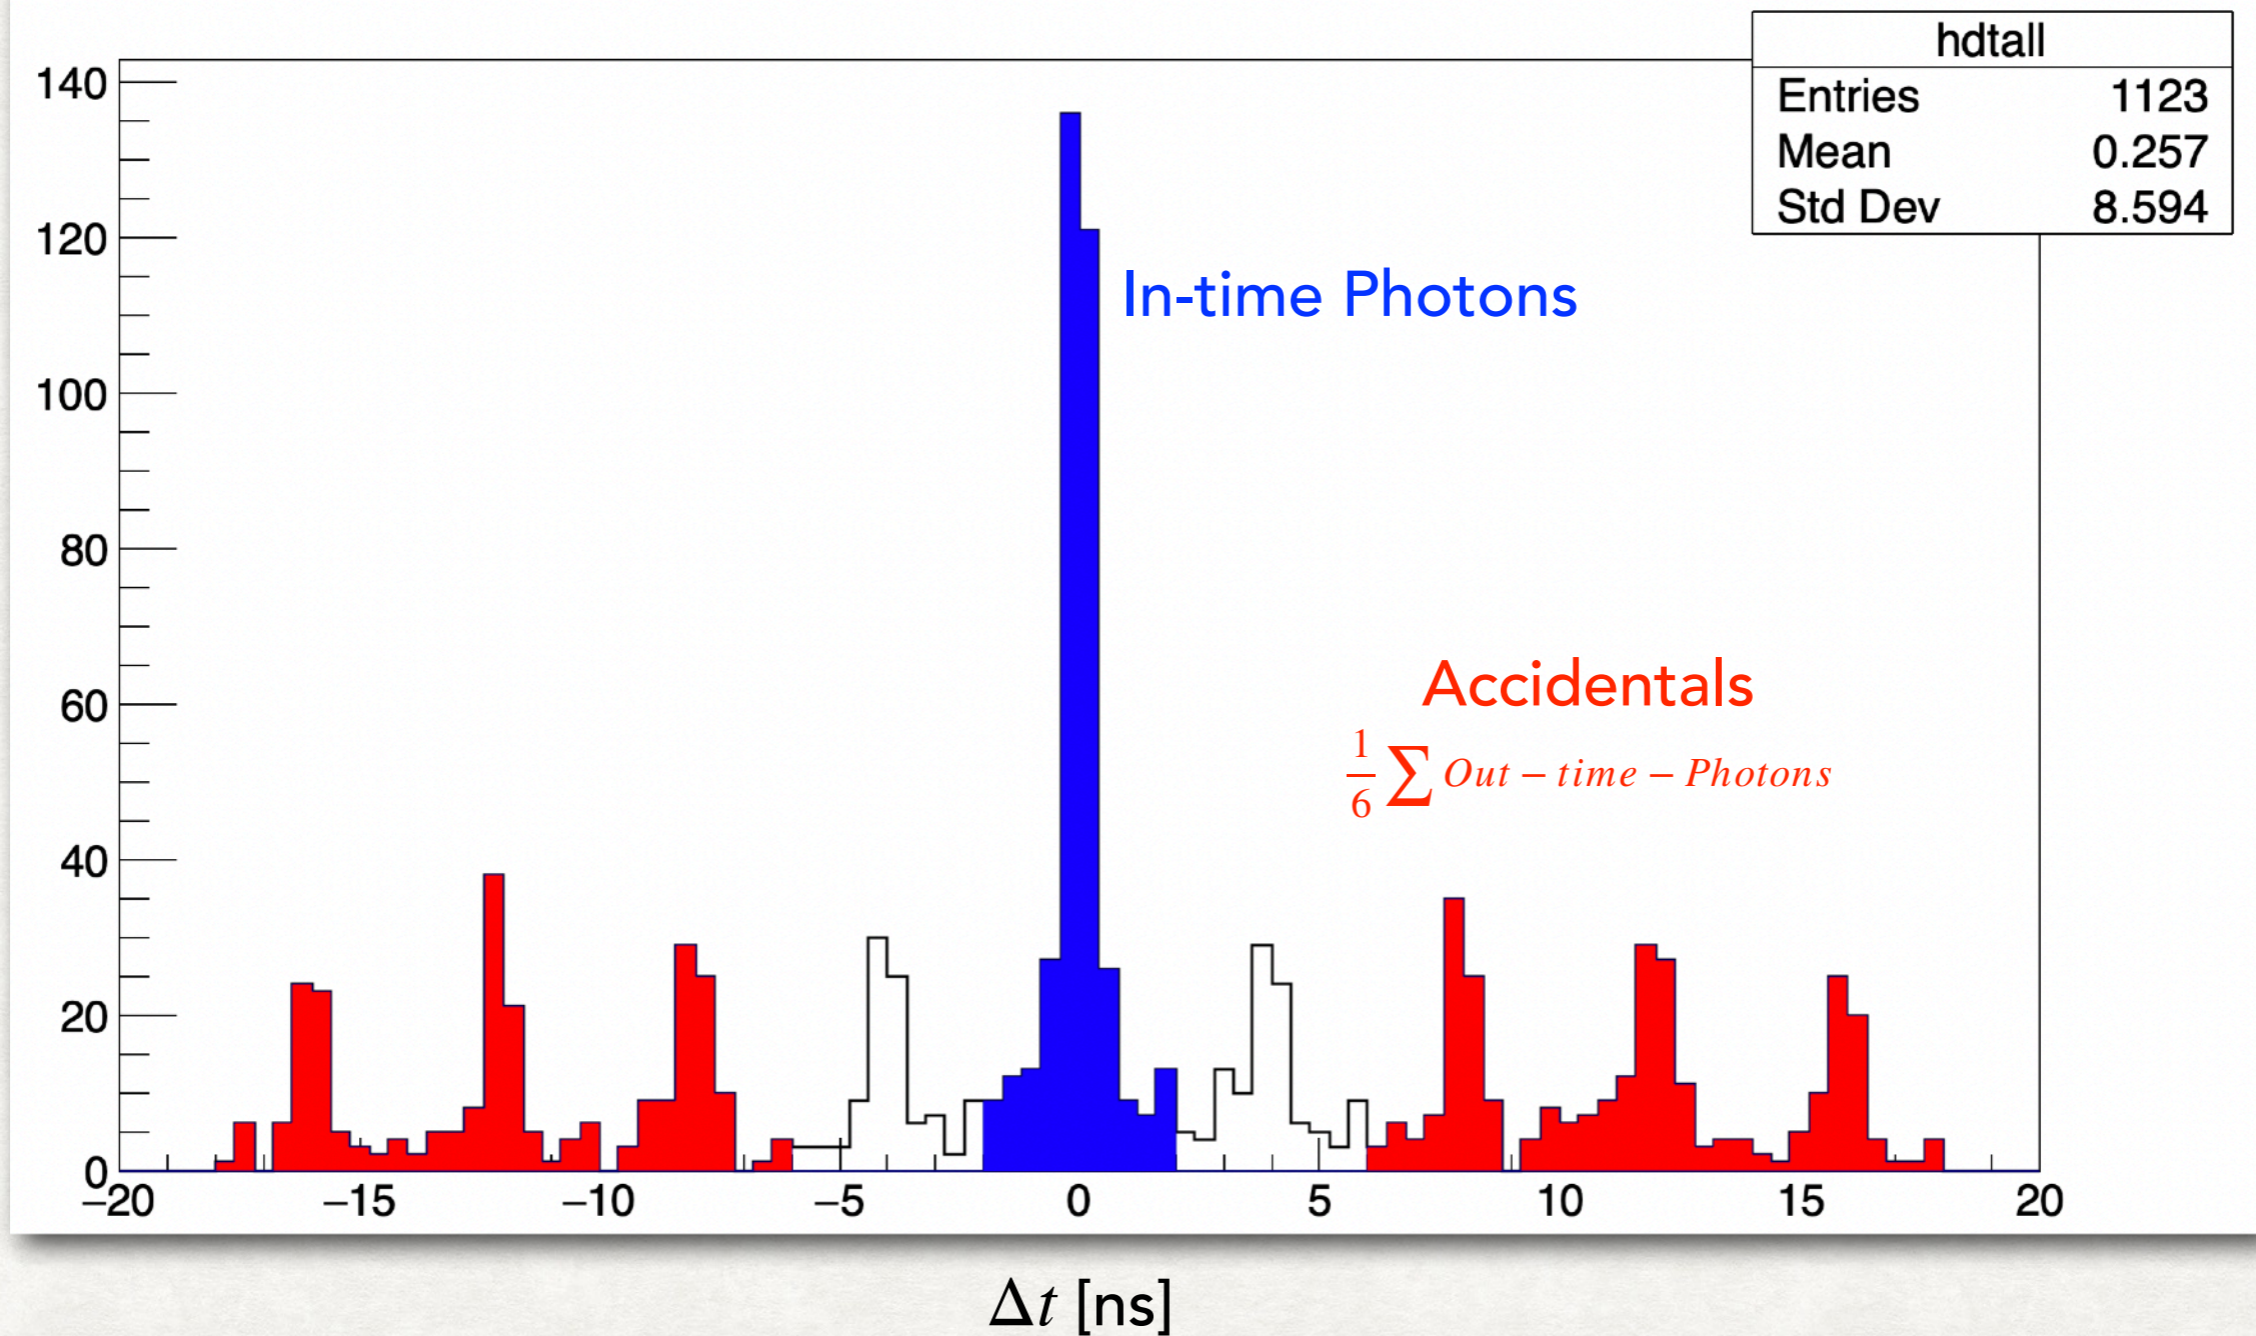

- Generated for  ${}^4\text{He}$
- Two components **Mean Field (MF)** and Short **Range Correlation (SRC)**
- Uses hdgeant4
- All events in the simulation was from the center of the target.
- The simulation events have been selected using the same logic than the data. (Requirements for the event selection)
